Single and Double Gang Recessed Cable Plate Installation Kits 50-3331-WH-KIT & 50-3332-WH-KIT

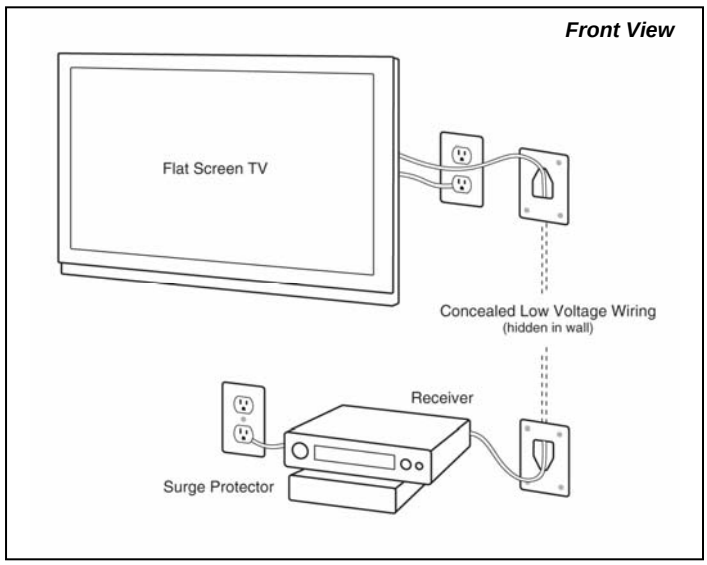
50-3331-WH-KIT

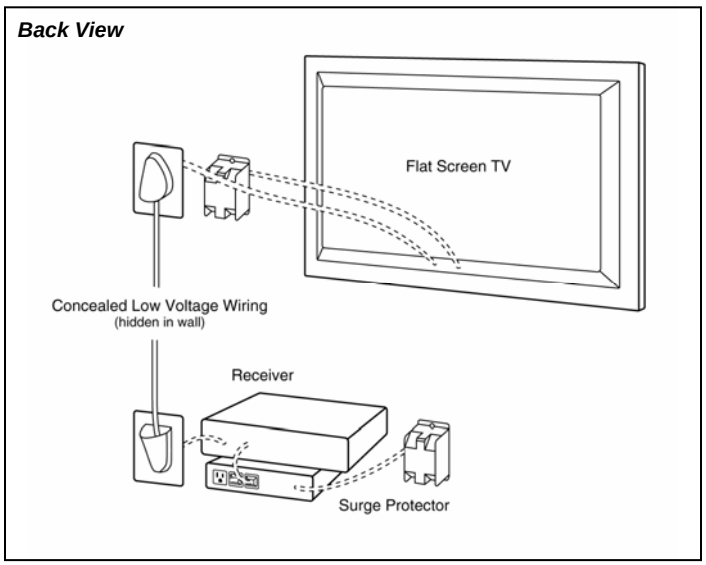
50-3332-WH-KIT

Use DataComm Electronics' new Single and Double Gang Recessed Low Voltage Cable Plate Installation Kits to install and hide unwanted audio/video (A/V) cables behind your flat panel TV, your amplifier or other audio/video devices. These kits bring a clean, professional image to your at-home installation.

Determine the location of your flat panel TV, amplifier or audio/video device. Cut a hole in the wall and install the low voltage mounting bracket. Then simply pull your cables through the low voltage mounting bracket and then through the recessed cable plate. Insert the recessed cable plate into your installed mounting bracket and secure with the included screws. See diagrams below. The Single and Double Gang Recessed Cable Plate Installation Kits come with simple instructions for a quick and easy installation.

National Electrical Code (NEC) does not allow the installation of the TV power cord or an extension cord behind the wall.





U.S. Patent Numbers D553475, D554475 and 7390964.
