

the DVI hub

DVI Distribution Amplifier

1:2 DA

One DVI input,
two DVI outputs.
Extends DVI
up to 100 ft.
(30 meters)

Features

- Splits the computer DVI graphics to two DVI displays
- Connects two DVI display monitors at the same time to the same video source
- Uses DVI cables to connect to and from the DVI input and the DVI hub output
- Extends any DVI (Digital Visual Interface) compliant device up to 100 feet from the computer
- Allows simultaneous display at local and remote locations
- Maintains 1920 x 1200 resolution
- Supports Apple flat panel displays
- Supports DDWG standard for DVI compliant monitors
- Installs in seconds
- Rackmountable

The ex-tend-it DVI Hub allows computers with DVI graphic cards to be connected to one or two DVI compatible monitors or projectors.

The DVI Hub keeps your desk clutter-free, relocating your computer to a safe and secure area, while allowing you to work in a quiet environment. An additional configuration lets you keep your DVI monitor next to your computer, while adding an extended second DVI display such as a projector, another DVI monitor or plasma display.

The DVI Hub can be connected to any Apple flat panel display with ADC connection using the ex-tend-it DVI to ADC Conversion Box.

The DVI Hub can be used as a DVI Repeater allowing long distance DVI extension.

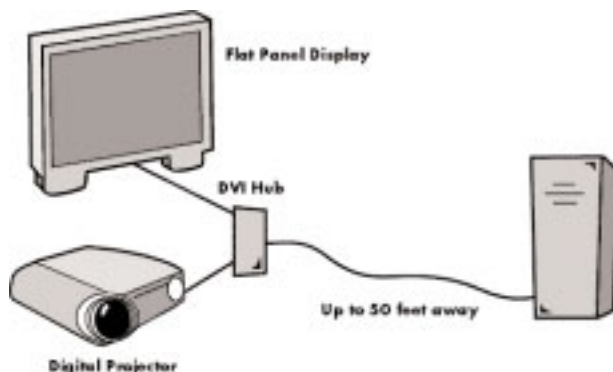

How it works

The ex-tend-it DVI Hub is connected with a DVI (male to male) cable from the computer DVI graphic port to the DVI Hub input. There are two DVI outputs. DVI output one is the primary connection and is used for the main display. DVI output two is connected to the second display.

Includes

1. the DVI Hub
2. 6 foot DVI cable (m-m)
3. 12V power supply

Specifications:

- DVI Amplifier Bandwidth:** 1.65 GHz
- Actual Bandwidth:** 1.6 GHz
- Input Video Signal:** 1.2 volts p-p
- Input DDC Signal:** 5 volts p-p (TTL)
- DVI Connector:** Molex 24 pin female
- Power Consumption:** 15 Watts (max.)
- Power Supply:** External 12 VAC
- Dimensions:** 8"W x 1.75"H x 4"D
- Shipping Weight:** 8 lbs.
