

Analog Audio Cable High Performance Analog Cable GXAV-LR-XX

Built with the most sophisticated technology and innovative features, GoldX® PlusSeries® Analog Audio Cable by JDI enhances the performance of all your electronic devices. These high-performance cables enable you to obtain a better sound quality from today's sophisticated electronic equipment.

The connectors of the Analog Audio Cable are especially molded to provide a textured comfort grip to make the installation of the product easier. Adding to the ease of installation are integrated labels, which are color-coded for easy identification.

The maintenance of signal integrity is also assured by a high-density, double-layer shielding. An oxygen-free copper durable PVC jacket surrounds the center conductor. This yields a high quality digital signal along with flexibility, strength and appeal. The inner shield has 100% Mylar backed aluminum foil. This prevents high frequency signal noise and interference. The outer shield consists of a 95% copper braid, which prevents most low frequency signal noise and interference.

The 24k gold contacts make for maximum signal transfer and corrosion resistance. The contact's are precision-machined and provides reduced signal loss at the connectors.

Features:

- 24K Gold plated studio grade connectors
- Improved signal transfer with high grade oxygen-free copper wire
- Dual Shielding reduces interference
- Balanced cable for optimum performance
- Designed for Left & Right Channel Audio

Available lengths in Feet

Comfort Grip Molding
