

Composite Video Cable High Performance Digital Cable GXAV-Y-XX

This high-performance Video Cable provides a superior connection for your digital equipment. GoldX® PlusSeries® quality cable construction guarantees the highest integrity of signal transfer, resulting in a picture that is sharp, clear and vivid for an improved viewing experience from your equipment.

The connectors of the Video Cable are especially molded to provide a textured comfort grip to make the installation of the product easier. Adding to the ease of installation are integrated labels, which are color-coded for easy identification.

The maintenance of signal integrity is also assured by a high-density, double-layer shielding. An oxygen-free copper durable PVC jacket surrounds the center conductor. This yields a high quality digital signal along with flexibility strength and appeal. The inner shield has 100% Mylar backed aluminum foil. This prevents high frequency signal noise and interference. The outer shield consists of a 95% copper braid, which prevents most low frequency signal noise and interference.

The 24k gold contacts make for maximum signal transfer and corrosion resistance. These contacts are precision-machined and provide reduced signal loss at the connectors.

Features:

- 24K Gold plated studio grade connectors
- Improved signal transfer with high grade oxygen-free copper wire
- Corrosion-resistant connectors designed for maximum conductivity and low signal loss
- Dual Shielding reduces interference, noise and distortion
- Designed for composite video
