

## Tool with 110D Blade GXN-PDT110

Using this tool will help you ensure that you have well seated connections on all industry standard 110 style IDC connectors. The dual impact settings are helpful when you find that the wire is just not seating right. Standard blades are used in this tool, so if you damage or break the blade, or if you find that a job requires a Krone tool or 66 style block tool, just pick up a blade and use the same impact handle.

The blade which is included has both a punch only and a punch and cut side. If you need to punch wires down without trimming the extra wire off, then use the punch only side. If you want to punch and trim at the same time, then use the side that has "cut" stamped into it.

### Features:

- Sturdy handle
- Blade included
- Premium quality
- Replaceable blade
- Blade Storage in handle
- Dual impact settings, low and high
- For use with industry standard 110 connectors
- Harris Punch Downtool Blade Compatible
