

## 2 Inch J-Hook Cable Support - Beam Clamp, Galvanized, 25 Pack

The 2 Inch J-Hook Cable Support with Beam Clamp is designed for efficient and cost-effective structured cabling installations. Below are its key specifications:

- **Material:** Constructed from 18-gauge galvanized steel with a zinc finish, ensuring durability and rust resistance.
- **Diameter:** 2 inches.
- **Mount Style:** Beam clamp mount, allowing for secure attachment to beam flanges.
- **Compatibility:** Ideal for supporting various cables, including conduit, coaxial, fiber optic, and Ethernet cables such as CAT5e, CAT6, CAT6a, and CAT7.
- **Quantity:** Available in packs of 25.
- **Compliance:** Meets or exceeds EIA/TIA requirements for structured cabling systems.
- **Design Features:** Features smooth edges to maintain proper bend radius and prevent cable damage during installation.
- **Additional Accessories:** Includes 25 retainer clips for securing cables.

This J-Hook provides a cost-effective alternative to more expensive ladder racks and cable tray systems, ensuring proper support and organization for various low-voltage cabling applications.
