SC Fiber Optic Loopback Adapter - OM5 Multimode (50/125)

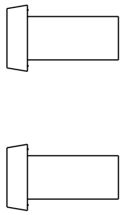

Networx SKU: **FL-SC5MM5** | GTIN: 00845425024343 | SC/UPC, Beige connectors

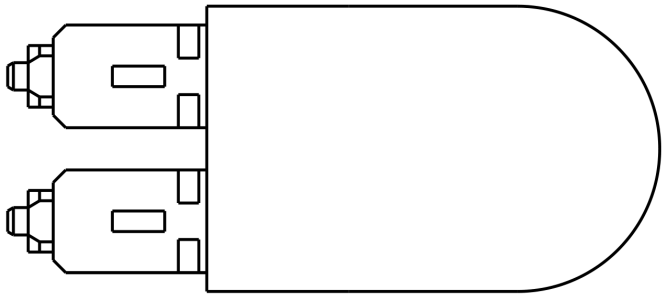

The Networx® SC OM5 Multimode (50/125) Loopback Adapter is a compact diagnostic tool for testing and troubleshooting fiber optic networks. Plugged into an SC transceiver or port, it loops the transmit signal straight back to the receiver - a reliable return path for verifying transceiver function and link integrity in the field or the lab. Built with Corning fiber and precision-molded SC/UPC connectors in a protective black housing, it delivers consistent, repeatable results. OM5, also known as wideband multimode fiber (WB MMF), supports shortwave wavelength division multiplexing (SWDM) and is backward compatible with OM3 and OM4 systems.
