

Server Enclosure 27U 23"W x 31"D x 54"H, Tempered Glass Door, Removable Side Panels, Solid Rear Door, Knockdown

Keep your enterprise, telecom, or critical IT infrastructure secure, organized, and cool with the Networx® SE-S201-27U Server Enclosure. Designed for optimal airflow and structured cable management, this 27U floor-standing cabinet features a tempered glass front door with advanced locking, removable side panels, and a solid rear door, all constructed with durable SPCC Cold-Rolled Steel.

Vented top and bottom panels improve thermal performance, while fully adjustable mounting rails make it easy to customize the layout for various rack-mounted devices. Knockdown delivery makes for convenient shipping and setup.

Key Features

- **Rack Height:** 27U (27 rack mount units)
- **Front Door:** Tempered glass with secure locking mechanism
- **Rear Door:** Solid, locking steel panel
- **Side Panels:** Removable, solid, and locking for easy access
- **Mounting Rails:** Depth adjustable; tapped for M6 cage nuts
- **Cable Access:** Dual top and bottom cable entry points
- **Cooling Support:** Vented top panel for heat dissipation
- **Mobility & Stability:** Includes casters and leveling feet
- **Construction:** SPCC cold-rolled steel with RAL9005 black finish
- **Assembly:** Knockdown style for easy shipment and installation

Applications

- Server and switch housing in enterprise and telecom environments
- Rackmount UPS, patch panels, and structured cabling integration
- Data center deployments and equipment closets requiring ventilation and cable routing flexibility
